17. ABSTRACT (MAX. 250 WORDS)

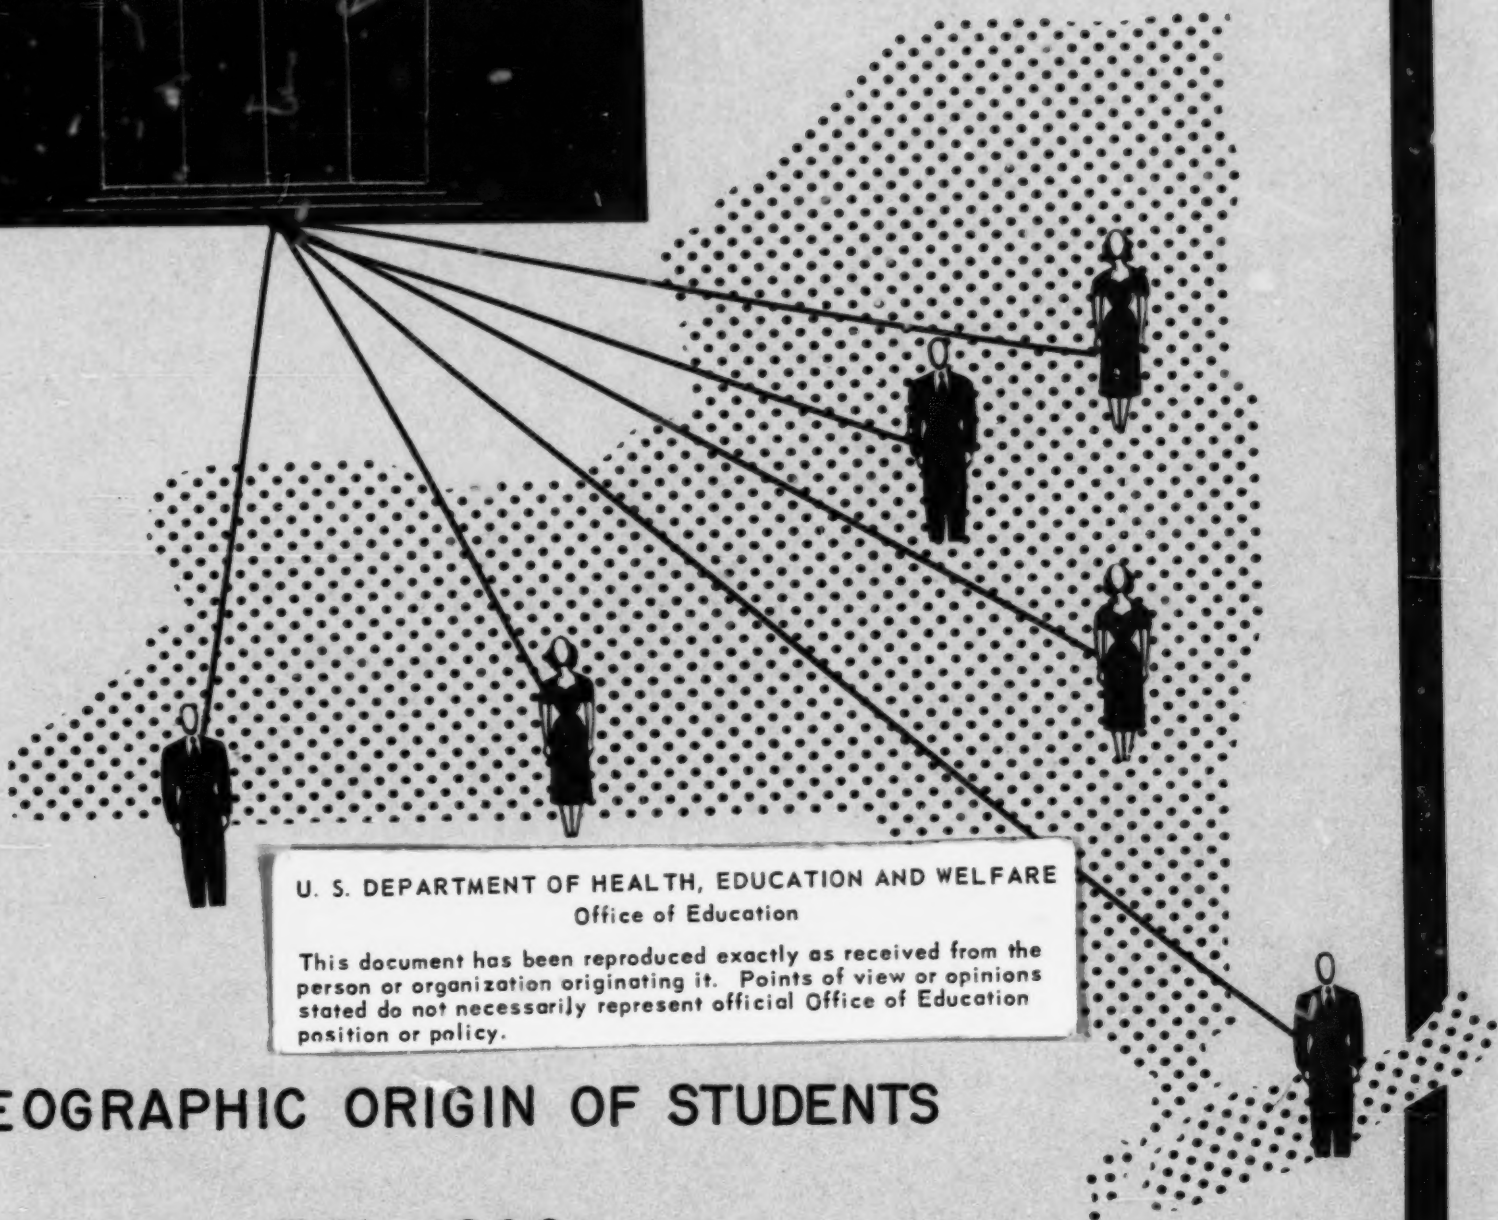

An annual publication of the university research office in which statistical tables present data on the geographic origins of students in the State University of New York. New York State students are reported by county of residence and out-of-State students by geographic region of the United States and by country. The figures represent full-time, day-division, and degree-credit course enrollment only. A more detailed analysis of the figures and a comparison with the 1958 and 1959 reports was planned for early 1962.

Research Office

Albany, New York

STATE UNIVERSITY OF NEW YORK

Fall 1960

The State University, established in 1948, has continually exhibited growth in students, faculties and facilities. At the time of this report, the University embraced forty ix colleges which, although geographically separated, are united in the purpose of providing opportunity for higher education in New York. This purpose is succinctly summed up in the motto of the University "Let each become all he is capable of being."

Liberal Arts College

Harpur College at Binghamton

Medical Colleges

Downstate Medical Center in Brooklyn (N.Y.C.)
Upstate Medical Center at Syracuse

Colleges of Education

College of Education at Albany
College of Education at Brockport
College of Education at Buffalo
College of Education at Cortland
College of Education at Fredonia
College of Education at Geneseo
College of Education at New Paltz
College of Education at Oneonta
College of Education at Oswego
College of Education at Plattsburgh
College of Education at Potsdam

Other Professional Colleges

College of Forestry at Syracuse University
Maritime College at Fort Schuyler
Long Island Center at Oyster Bay
College of Ceramics at Alfred University
College of Agriculture at Cornell University
College of Home Economics at Cornell University
School of Industrial and Labor Relations at Cornell University
Veterinary College at Cornell University

Agricultural and Technical Institutes

Agricultural and Technical Institute at Alfred
Agricultural and Technical Institute at Canton
Agricultural and Technical Institute at Cobleskill
Agricultural and Technical Institute at Delhi
Agricultural and Technical Institute at Farmingdale
Agricultural and Technical Institute at Morrisville

Community Colleges

(Locally sponsored two-year colleges under the program of State University)

Auburn Community College at Auburn
Bronx Community College at New York City
Broome Technical Community College at Binghamton
Corning Community College at Corning
Dutchess Community College at Poughkeepsie
Erie County Technical Institute at Buffalo
Fashion Institute of Technology at New York City
Hudson Valley Community College at Troy
Jamestown Community College at Jamestown
Mohawk Valley Technical Institute at Utica
Nassau Community College at Mineola
New York City Community College of Applied Arts and Sciences
Orange County Community College at Middletown
Queensborough Community College at New York City
Rockland Community College at Suffern
Staten Island Community College at New York City
Suffolk County Community College
Westchester Community College at Valhalla

STATE UNIVERSITY OF NEW YORK

GEOGRAPHIC ORIGIN OF STUDENTS

FALL 1960

RESEARCH OFFICE

ALBANY, NEW YORK

BRIEF HIGHLIGHTS

Ninety-seven per cent of the full-time undergraduate students enrolled in the University are residents of New York State.

Approximately seven of every ten full-time undergraduate students enrolled in the four-year colleges of the University are Upstate New York residents.

Nine of every ten full-time students enrolled in the M.D. Program at Downstate Medical Center are from the New York Metropolitan Area.

Metropolitan New York Area residents make up one-fourth of the full-time M.D. Program at the Upstate Medical Center at Syracuse.

Three of every four full-time undergraduate students enrolled at the Colleges of Education are from Upstate New York.

Four of every ten full-time undergraduate students at the Other Professional Colleges are from the New York Metropolitan Area.

At the two-year colleges, the full-time students from Upstate New York exceed the full-time students from the New York Metropolitan Area by approximately one thousand students.

Excluding Farmingdale, nine of every ten full-time students at the Agricultural and Technical Institutes are Upstate New York residents. The reverse is true at Farmingdale where nine of every ten full-time students are from the Metropolitan New York Area.

Approximately one-half of the full-time Community College students are New York Metropolitan Area residents.

STATE UNIVERSITY OF NEW YORK

Geographic Origin of Students
Fall 1960

The Geographic Origin of Students is an annual publication of the State University Research Office. In the report, New York State students are reported by county of residence, Out-of-State students by geographic region of the United States and by country. The New York State figures are shown in two ways:

1. Economic Areas of New York
2. Home and Neighboring Counties

The figures represent Full-Time, Day Division, Degree Credit Course enrollment only. The geographic patterns of the undergraduate and graduate enrollment differ considerably and therefore, the total enrollment has not been summarized.

The report deals with the existing conditions at the University only. A qualitative analysis of the data in terms of the desirability of a cosmopolitan atmosphere and the needs and facilities for higher education in New York is beyond the scope of this report.

The undergraduate enrollment of New York State students continued to exceed the Out-of-State students by a ratio of approximately thirty-five to one. New York State students also experienced a greater rate of increase than Out-of-State students during 1958-1960. The New York State rate was 24% whereas the Out-of-State rate was 12%. More dramatically stated, the total undergraduate enrollment increased by more than eighty-five hundred students from 1958 to 1960, while during the same period, the Out-of-State enrollment increased by 128.

The Out-of-State figures is a total of United States residents (excluding New York) and residents of foreign countries. Approximately seventeen per cent of the Out-of-State undergraduate students are from foreign countries, and approximately one-half of the United State students are from New Jersey and Pennsylvania. As would be expected, the next largest group of Out-of-State undergraduate students are from New England.

In contrast to the undergraduate enrollment, approximately three of every five graduate students are Out-of-State residents. Thirty-eight per cent of the Out-of-State graduate students are from foreign countries as compared to 16.7 per cent of the Out-of-State undergraduates.

New York Metropolitan Area

The largest proportion of New York State undergraduate students come from the New York Metropolitan Area which, in part, reflects the fact that over one-half of the state's population resides in this area. The per cent of the undergraduate students at the University from this area has increased

from 32.4% in 1958, to 34.4% in 1959 to 36.6% in 1960. The per cent of undergraduates from the Metropolitan New York Area in 1960 was 30.2 per cent at the State Colleges and 51.4 per cent at the Community Colleges. The latter figure is influenced in large measure by the fact that each of the counties in the Metropolitan Area has a Community College.

Among the four-year colleges, Harpur has the largest proportion of undergraduate students from the New York Metropolitan Area. The enrollment from this area has been increasing steadily and for the past two years has exceeded the enrollment from the Binghamton Area. In 1958, 32.9 per cent of the undergraduates of Harpur came from the New York Metropolitan Area. This figure increased to 38.9% in 1959 and 42.4% in 1960. The Binghamton Area showed a corresponding decrease during this period: 35.5% in 1958; 29.3% in 1959 and 23.9% in 1960. The per cent of decrease is also a numerical decrease of thirty students from the Binghamton Area.

The Colleges of Education had the smallest proportion of students from the New York Metropolitan Area, 26.7 per cent. This is as expected as the municipal colleges of New York City also offer teacher training programs. The proportions varied at the individual Colleges of Education, ranging from seven per cent at Buffalo to fifty-six per cent at New Paltz. (See Table 9)

The proportion for the total Other Professional Colleges was 40.8 per cent, ranging from a high at Maritime (717) to a low at Forestry of 19.6 per cent.

The enrollment from the Metropolitan Area at the Two-Year Colleges is very decidedly influenced by geographical proximity. Over 90 per cent of the enrollment in the Community Colleges originate in the local area in which the college is located. Conversely, less than 10 per cent of the enrollment originate outside the area in which the college is located.

The Agricultural and Technical Institutes exhibit a relatively similar pattern.

Over ninety per cent of the Medical Program enrollment originates from the New York Metropolitan Area. This is not surprising, but it is interesting to note that at the Upstate Medical Center, the enrollment from the New York Metropolitan Area is greater than from any other area, including the Syracuse Area. This is also the case at the Veterinary Medical Program at Cornell.

At the Other Professional Colleges, the graduate enrollment from the New York Metropolitan Area does not rise over ten per cent with the exception of Ceramics. (See Table 4, Section II)

Home and Neighboring Counties

At the Four-Year Colleges, with the exception of Long Island and Maritime, less than thirty per cent of the undergraduate students originate in the Home or Neighboring Counties. The students choice apparently is based upon the specialized program rather than geographical proximity. It seems logical to assume that this is also true of the students at Maritime as students living

near the sea coast would be more oriented toward a Maritime career. The subsidies available, which lower the cost of attending Maritime, may also be a causal factor.

The high percentage of Home and Neighboring County students attending the Long Island Center is directly related to the lack of dormitory facilities at the temporary campus at Oyster Bay. When the college moves to the permanent site at Stony Brook, the proportion will assume a pattern similar to that at the Other Professional Colleges.

The Colleges of Education located in Western New York (Buffalo, Brockport, Fredonia and Geneseo) have larger proportions of students originating from the Home and Neighboring Counties than the other Colleges of Education. The underlying reasons for this are not easily discernible and, therefore, no explanation is offered at this time.

The Agricultural and Technical Institutes appear to attract students from sections of the state outside the Home and Neighboring Counties to a greater degree than the Community Colleges. With the exception of Hudson Valley and Mohawk Valley, at least eighty per cent of the enrollment at the Community Colleges originate from the Home and Neighboring Counties.

The enrollment originating from foreign countries and territories of the United States is presented in Exhibit 3 and 4. Students from over sixty foreign countries are enrolled in the University.

A more detailed analysis of the figures and a comparison with the 1958 and 1959 Reports is planned for early 1962.
